

# Historic Gardens of Perth

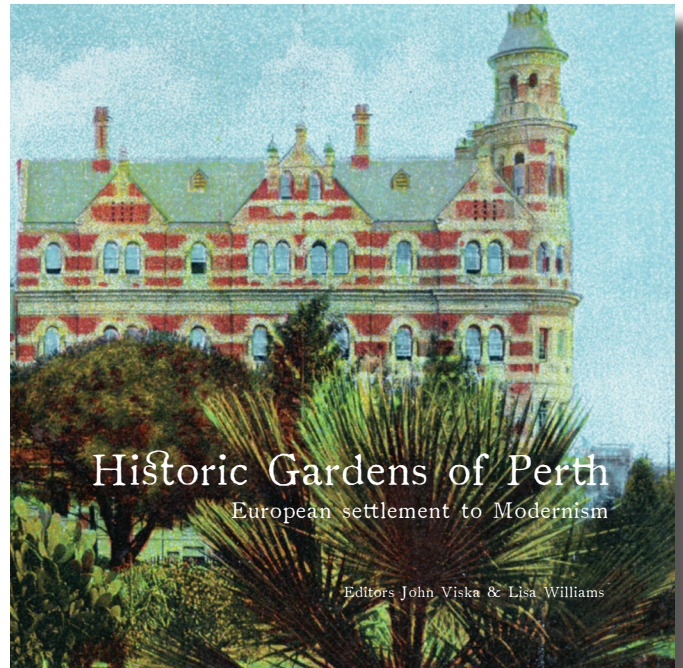

## European Settlement to Modernism

Editors John Viska & Lisa Williams

With 200 hundred pages of historic photographs, maps, plans artworks and text, *Historic gardens of Perth: European Settlement to Modernism*, is the first publication to deal solely with the history of gardens in Western Australia. The book is the result of research for two exhibitions presented by the WA branch of the Australian Garden History Society in 2011 and 2018.

Written by members of the Society which includes professional historians, horticulturalists, landscape architects, curators and cultural heritage practitioners, the book is informative and visually appealing. Not only will it prove invaluable to garden heritage professionals, but also to the wider public with an interest in gardens and heritage.

Spanning approximately 130 years, each chapter includes an historical overview of the era, with many previously unpublished images, and a summary of the garden styles popular during those decades. The book is complemented by a plant list appendix, denoting the species available to gardeners in Western Australia over that time.

**RRP \$50.00 (AGHS Members special price \$40.00)**
